1

Theoretical context

The Standard Model (SM) describes how the SM is.

2

Probability

As stated in ??, this section defines the concept of probability, which was proposed in [1]. See Figure 2.1 and Table 2.1.

Table 2.1: This is a caption.

Name	Definition	Alternative names
Purity	$\frac{TP}{\text{Predicted Positive}} = \frac{TP}{TP+FP}$	Precision
Efficiency	$\frac{TP}{\text{Real Positive}} = \frac{TP}{TP+FN}$	Recall, True Positive Rate
False Positive Rate	$\frac{FP}{\text{Real Negative}} = \frac{FP}{FP+TN}$
